

Market Overview

The Sacramento EdgeConneX Edge Data Center® (EDC) has been purpose-built and precisely located in order to provide a secure colocation facility for customers wishing to deliver content and applications to local-market consumers, with the lowest possible latency. Partnering with network and cable operators at the local level, our carrier neutral facility guarantees the shortest and fastest routes for delivering content to local market subscribers (consumer and enterprise) and Internet customers.

Sacramento sits at an intriguing location for data center development, with lower overall costs of development and operations than the typical facility in the Bay Area. The citu is still close by for low-latency connectivity, with excellent placement to the growing data center markets of Portland and especially Reno. The EdgeConneX Sacramento data center is in the traditional cluster in Rancho Cordova, home to enterprise and other facilities.

Campus Highlights

- SACO1: 1.5 MW N+1, scalable to 3 MW
- · SACO1: Network diversity
- · SACO1: Within 14 miles of downtown Sacramento

EdgeConneX Benefits

Capacity

State of the art data center with the flexibility to support deployments ranging from a single rack, to a large custom cage or pod, all the way to a build to suit data center any of which can further scale to meet future needs for growth.

- Connectivity

Many leading NSP's and MSO's are deployed in our Sacramento Data Center and available for interconnection.

Capability

Purpose-built Tier-3 designed facilities with superior operating reliability, highdensity power, and carrier-neutral support to satisfy any customers challenges and demands.

Cloud

Multi-hybrid cloud solutions for enterprises can be supported through our technology and solution partners meaning customers can locally access leading CSP's from our Sacramento Data Center.

Customer Experience

EdgeOS DCIM platform allows remote monitoring and management of your workloads.

Partners

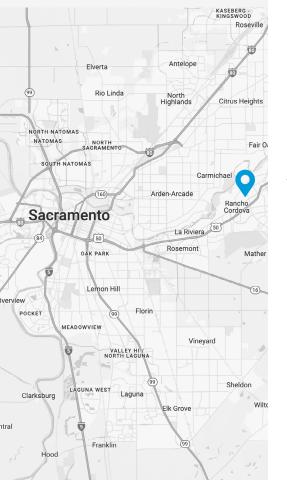

Our world-class partners help EdgeConneX deliver the combination of solutions your business needs.

SAC01

10980 Gold Center Dr. Rancho Cordova, CA 95670

Technical Specifications & Configuration

Space

28,500 sq ft facility

6,500 sq ft of raised floor for tenant racks

Within 14 miles of downtown SAC and 25 miles of Sacramento International Airport

Customer work space available

WiFi network access and cell phone repeaters/boosters throughout the facility

Power

1.5 MW N+1; planned for 3 MW

Concurrently maintainable power in a minimum of an N+1 configuration includes: - PDU - UPS - Generators

Capable of 20+kW per cabinet

Capable of 600+ watts per sq ft

Ghost space not required for cooling power dense installations

Real-time branch circuit monitoring

Cooling

The facility has robust and redundant power and cooling to support any application, where temperature and humidity is monitored, controlled and managed to industry standards

30 inch raised/under floor forced air plenum

N+1 CRACs located in separate suites, maximizing customer designated areas

Security

Multi-stage security containment systems that use PIN and live video authentication

Mantraps and strictly enforced protocols regarding entry access

24/7 Color CCTV/video surveillance and >90-day online video storage

Interior managed security zones

National network operations center for security management

24/7 NOC services

Fire Suppression

Pre-action, zoned dry-pipe sprinkler systems with zoned maintenance aisles and separate suites

Network

Building POEs are diverse, with physically diverse MMR's

Astound/Wave, CloudFlare, Comcast, Comcast Business, Lumen, NinjalX, Uprise Fiber, WhiteSky, Zayo

Interconnection services available

Optional Services

Remote hands services for break fixes, configuration, and troubleshooting

EdgeConneX Services: design, build, implement, and maintain your equipment infrastructure

EdgeOS, our next generation data center operating system provides real-time visibility, including ticketing and SLA management for all EDC locations

Standards and Certifications

The SACO1 data center is SOC2 Type 16, ISO 27001, PCI DSS and HIPAA compliant.
